

Preparing Children for the Future

CURRICULUM STATEMENT

for

DESIGN & TECHNOLOGY

Subject Leader: Mrs C Hennegan

Design and Technology is an inspiring, rigorous and practical subject. At Knowle CE Primary Academy, all children are given opportunities to use their creativity and imagination to design and make products that solve real and relevant problems within a variety of contexts, considering their own and other's needs, wants and values. They work both as individuals and as members of a team.

Pupils acquire a broad range of subject knowledge, drawing on mathematics, science, engineering, computing, and art. They are also given opportunities to reflect upon and evaluate past and present design technology to develop a critical understanding of its impact and effectiveness on daily life and the wider world.

Through the cooking and nutrition element of design and technology pupils are taught crucial life skills that will enable them to feed themselves affordably and well, now and in later life.

Design and Technology at Knowle CE Primary Academy enables children to take risks and become resourceful, innovative, enterprising and capable citizens.

Learning for Life
